WORK EXPERIENCE

Software Engineer

Nov 2024 - Present

Enigma Genomics

Dammam, Saudi Arabia (Remote)

- Engineered and deployed a production-grade web application leveraging **Next.js** and **TypeScript** for the **Saudi Genomics Database**, enabling researchers to perform advanced exploration and interpretation of genomic datasets with high efficiency and scalability.
- Supporting the team in improving a robust and scalable admin panel to streamline user management, data updates, and operational workflows.
- Designed and implemented PDF report templates using **PHP** and **DomPDF** for a youth wellness product, ensuring structured and professional report generation.

Software Engineer - Intern

May 2024 - Oct 2024

Enigma Genomics

Dammam, Saudi Arabia (Remote)

- Collaborated on the development of a cross-platform mobile application using **React Native**, **Expo**, and **Nativewind** to ensure a seamless user experience, integrated with **Firebase** for real-time database management and authentication.
- Designed and implemented dynamic **HTML** layouts, using **DomPDF PHP** to generate detailed and customizable PDF reports, streamlining reporting workflows.

Frontend Developer - Intern

Nov 2023 - Mar 2024

PiggyRide

Bengaluru, India (Remote)

- Upgraded PiggyRide's ride tracking platform by migrating from static HTML/CSS to a **3D React** application with **Google Maps JavaScript API**, **Three.js**, **Redux**, and **Tailwind CSS**.
- Modified the ride-request page (**Java Play framework**) to introduce the PiggyPass subscription model, improving user interactions and functionality.
- Resolved real-time vehicle and trip tracking issues on the Piggy Partner website (**React**), ensuring seamless functionality.
- Debugged the **React Native** consumer app, fixing sign-in, picture upload, and ride-request issues.

Frontend Developer - Intern

Mar 2023 - Oct 2023

Louverline Blinds

Bengaluru, India (Remote)

- Orchestrated the development of the [My Louverline](#) website, seamlessly providing 120 authorized dealers with real-time updates on product data, pricing, and stock availability through advanced technologies like **ReactJS**, **Google Apps Script API** for Spreadsheet, **Firebase**, and **Tailwind CSS**.
- Implemented a streamlined online ordering system, reducing the processing time by **30%** and saving the operations team **12 hours/week** while empowering dealers to order highly customizable products seamlessly.

PERSONAL PROJECTS

- Petu** A Restaurant delivery web app that employs **React**, **Redux** and **Tailwind CSS** for a captivating front-end experience and relies on **Firebase** for efficient back-end and authentication functionality. ([Live Link](#))
- Vide** A video-sharing cross-platform mobile app built using **React Native**, **Expo** & **Nativewind** for frontend and **Appwrite** for backend & user authentication.

SKILLS

Development: React.js, Next.js, React Native, Expo, Redux, Three.js, HTML, CSS, Tailwind CSS, Material UI, Firebase

Languages: JavaScript, TypeScript, Java, Python, PHP

EDUCATION

Veer Surendra Sai University of Technology, Burla
Bachelor of Technology, Electrical and Electronics Engineering

2020 - 2024
CGPA : 7.45

KMBB Science Higher Secondary School, Nayapalli
CHSE, Odisha (Class XII)

2019
Percentage : 74.33

CERTIFICATIONS

[Learn Advance Java](#): Codechef, [Developer Virtual Experience](#): Accenture, [Software Engineering Virtual Experience](#): JP Morgan & Chase, [Software Testing](#): Microsoft (NIIT Foundation)
